dinners at the naval base.

This scholarship is very meaningful to me. It allows me to continue my quest for higher education beyond high school. By providing me with this scholarship, my family and I have been given some financial relief which gives me a wider option in the colleges I could go to. It's also a nice thing to know that even though I do not know who the individuals are that gave me the scholarship, they cared enough about future generations to make it easier for us to obtain the education needed for tomorrow.
