Receiving this scholarship is truly an honor. It has given me the opportunity to afford to further my education at the College of William and Mary, where I hope to obtain a degree in Physics with a concentration in Astronomy. The Wings Over America community has also helped to honor the service of men and women of this great nation, which is a principle that I strive to uphold as well. This scholarship will help to shape the person that I will become over the next four years and provide me with opportunities to give back to my community, just as Wings Over America has given back to me.
