Receiving a scholarship from the Wings Over America Foundation is an incredible honor and will be invaluable in helping to continue to pursue my college goals. As a student pursuing both a B.S in economics and a B.S.E in mechanical engineering, this aid will help me be able to finish my undergraduate career with less financial stress than I ever thought possible. My passion is in energy, I believe that my interdisciplinary approach to my education will best equip me to help solve our future's energy needs, and Wings Over America is helping me to get there.
