Statement: Winning a 2012 scholarship award has meant that paying for college will be even that much less of a burden on my family. As I was applying to colleges, my parents kept encouraging me to apply regardless of cost. They were so supportive of me in my pursuits wherever I set my sights on, and I felt ungrateful as they offered to support me so much. And so, by receiving this scholarship, I am not only lessening the load for myself, but also for my parents who have offered to pay for school. I now can feel grateful and confident that I have helped contribute to funding my education, and it means so much to me that it is coming from a Navy child scholarship organization, an aspect of my life that has truly shaped me into who I am today.
