This scholarship not only means so much to me, but also means the world to my family. This scholarship will give me the opportunity to achieve more in my college classes without dealing with some of the financial stress that these classes may bring. It means a lot to me to receive this scholarship because I feel like it acknowledges the hard work I have put into my education and my community. Throughout high school, I have struggled with balancing my schoolwork with my social life and job. No one ever prepared me for the absurd amount of work that high school would throw at me. I had to immediately learn how to grow up and balance multiple responsibilities, as well as develop a strong and disciplined work ethic. This scholarship acknowledges my success in doing so and makes me feel appreciated and noticed. It means so much to me that Wings Over America noticed how hard I worked in and outside of high school these past 4 years. I am extremely thankful and humbled to be the recipient of this amazing scholarship award. It will not only help my family and me financially, but will open several doors for me in my freshman year at the University of South Florida. Thank you so much Wings Over America for acknowledging the hard work I have put into my high school career. This scholarship means the world to me.
