First and foremost, because I was selected out of other applicants, it provides additional confidence and indicates that I have proven myself to be academically qualified to continue my education at an institution of higher learning. Receiving this scholarship also means I have an obligation to work hard and achieve the best grades that I can. It is uplifting and gives me joy. Also, it will definitely help out my parents financially. Bottom line, it is a blessing, so one day I can be a blessing to someone else.
