This scholarship is important to me because it means that my hard work thus far has paid off, but it also tells me that someone recognizes the potential that I have. If I receive this scholarship it means that someone has invested in my future solely based on my past achievements. This scholarship is not the end, but the beginning of my responsibilities to give back to society. Nelson Mandela once said, “Education is the most powerful weapon which you can use to change the world,” and my education will help me achieve my goal of making a positive difference.
