- Volunteer at a shelter for expectant mothers

I cannot put into words how grateful I am to be receiving this scholarship. Not only does it make the college financial burden a little lighter, but it is a good reminder of all the people who care about helping to make our future brighter by supporting the up and coming scholars and researchers of our time. I am so proud of the career my father has had as a naval aviator up to this point, which is the main reason I was able to receive this scholarship. The life lessons and values he has taught me are invaluable. I must also say thank you to my teachers, youth ministers and most importantly my family, who have all supported me throughout the years and encouraged me to be the best I can be. This scholarship will help to open doors for me that have not otherwise existed in my continued education. I hope that by completing a major in chemistry I can use my knowledge to help enhance our world's future.
