I am incredibly honored and grateful to be a recipient of a Wings Over America scholarship. The scholarship brings me closer to my goal of a college education, with additional financial freedom. I am excited to move on to the next part of my education, studying Petroleum Engineering at the University of Kansas. Being awarded this scholarship will allow me to focus more of my time and energy learning about the energy field instead of worrying about the financial aspects of my college education. I am grateful to be one of the students selected and I am immensely thankful for Wings Over America and the opportunities they provide to numerous college-bound high school seniors. I understand how powerful an education can be, and with the help of this scholarship, I look forward to earning my engineering degree and turning my attention to helping to solve the world's energy crisis. Thank you for helping make my vision come true. Rock Chalk Jayhawk!
