I am deeply honored to receive this award. This scholarship helps make my dream of becoming a nurse or pediatrician specializing in neo-natal care at the University of Washington much more tangible. It also boosts my goal of self-sufficiency, by funding my own education through academic achievement and hard work without student debt. With my degree, I want to help my community by applying my expertise to disadvantaged youth; especially the very young, poor, and homeless. I also wish to use my leadership experience and future education to serve on boards of directors to provide vision and direction for community-wide level care and organization. This award is a direct recognition of my many community service activities, leadership and athletics. Schoolwork has been only part of these efforts. I am extremely grateful to be a recipient of a Wings Over America Scholarship, and am excited to pursue my degree and future medical career. Thank you also to the many generous donors who made this possible.
