- ❖ Summer Employment: NV Pools lifeguard.

I am thankful for receiving a WOASF scholarship. I will be attending Virginia Tech this fall. I intend to major in Computer Science and pursue graduate school. This scholarship will help me in reducing the total debt I have to pay off after attending college. It will allow me to not worry about paying off college as much, and to focus more on my career development, in which I am to be a software developer. I cannot over-state my gratitude to WOASF. It is an honor to be recognized by such an esteemed organization which offers to boost to my confidence to know that my hard work in high school has been recognized. The support of WOASF will encourage me to work harder in college, as I want to make the organization, I will represent proud. I plan to continue using my skills to live out Virginia Tech's motto of "Ut Prosim," meaning that I Serve.
