I am honored to be receiving a scholarship from Wings Over America. Having older siblings and family friends who have applied before, I know how competitive the caliber of applicants is. Receiving this scholarship is not just beneficial to me, but also the rest of my family. It will help lessen the load of my college tuition as well as help me take on opportunities that may not have been available without this financial support. Being recognized by Wings Over America validates all of my hard work throughout high school and will encourage me to work even harder in college. I hope to study Math and Biology during my time at Swarthmore College, where I will also be playing lacrosse and working a campus job in the athletic department. This is all made possible by receiving this scholarship.
