

# Maritime Patrol Association Scholar

Sarah McCarthy

Bow, NH

Trinity College Dublin

2021-2022: Freshman

Major: Mathematics

It is with great honor and gratitude that I have been selected to be a recipient of the Wings Over America Scholarship. After my father retired, I began to reflect on my time as a military dependent and student in the overseas Department of Defense School System and appreciate not only the education I received but the extraordinary level of personal support that was provided to me by my teachers. This scholarship will go directly towards my tuition and allow me to study Mathematics so I may pursue my dream of becoming a high school mathematics teacher for the Department of Defense School System. As a teacher, I will have a unique perspective as a former DODSS student and be able to offer other military dependents the same positive experience and support I received while helping others grow to love the subject of mathematics.
