2024-2025: Freshman

Major: Chemical Biosciences

Academic & Extracurricular Highlights:

- Anchored4Life, President
- Swim Instructor
- Shadowing Pediatrician
- Volunteer: Anchor Church Children's Ministry

Receiving the Wings Over America Scholarship is an honor which I am proud and grateful to accept. I aspire to continue to pursue higher education in undergrad as a Chemical Biosciences major on a pre-medicine advising track. As I move into my undergraduate and postgraduate aspiration, this scholarship is not only a financial provision, but an investment in my academic pursuits. By relieving some of the financial burden, I will be able to have more focus on my extracurriculars and mentorship opportunities. Having the freedom to channel additional time and energy towards such activities enables me to hone my skills and contribute to the community. While I continue my academic and personal growth, this scholarship validates and reaffirms my efforts. I am inspired to continually strive for excellence in education and community service. Because I am attending college out-of-state, I will be continuing to branch out. I am eager to broaden my horizons, and this scholarship opens the door to additional opportunities and experiences. With this scholarship, I will be able to pursue additional opportunities in and out of the classroom and am empowered by the support of the Wings Over America Scholarship Foundation.
