I am honored to have given the opportunity to receive the Wings Over America Scholarship. This scholarship has given me the opportunity to commence a higher education while being close to home, which I am truly grateful for. I plan on studying Mechanical Engineering at the University of San Diego. Education is something that I genuinely value. Both of my parents worked vigorously to put me in a position where I can excel in my education, which has taken an important role in shaping me to who I am today. This scholarship will help lessen the financial burden of my attendance to the University of San Diego. I'm now able to keep my mind focused on my studies and extracurricular activities that I will pursue. Again, I am truly honored to have received the Wings Over America Scholarship and I thank you for investing in my studies and allowing me to pursue a higher education.
