I would first like to thank everyone associated with the Wings Over America scholarship program. It is truly a great honor to receive this award. This scholarship will enable me to focus on my studies and assist my family in paying for my education next year at my dream school of Virginia Tech. As a Hokie, I plan on studying Biological Sciences with a biomedical emphasis. This will provide me with a solid foundation to pursue medical school upon graduation from college. I am exceedingly thankful for this scholarship from Wings Over America knowing that there are hundreds of extremely talented students applying every year.
