This foundation is such a well-respected and powerful institution, and it is such a great accomplishment for me to receive this scholarship and be included in the rich history of the Wings Over America Foundation. Being presented with such a scholarship in some small way validates my family's constant moves and shows that a life of sacrifice and dedication to one's country has truly developed my character into a person for others. As I continue my Pre-PA journey, I have this Wings Over America Scholarship to be thankful for, as it put me on a path of education that allowed me to challenge myself and build my character. As a University Scholar, I can immerse myself in all aspects of knowledge such as historical texts, medical humanities, and arts in addition to my science program. The WOASF has opened many opportunities for me in my undergrad and I whole-heartedly appreciate everything they do for me and other students. As I go into my final year at Baylor University, I am appreciative of the connections I have made with friends and teachers who have pushed me to strive for success. My college experience has been everything I could have imagined and more, and I owe a big thank you to WOASF for all of their support.
