This scholarship allows me to continue my education at Shenandoah University and work towards my goal of graduating from college with a degree in sports management. With this degree, I plan on being an athletic director at a high school or college. Less focus on finances allow me to focus more on my courses. Not only does this scholarship provide some financial relief for me, it assists my hardworking parents who have supported me as I pursue my education. I appreciate the generosity of Wings Over America as the Foundation has inspired me to also give back when I am able to one day. With the generosity and opportunity which WOASF gives, I would be forced to take out loans, which is not an ideal way to start off my independent adult life. I am honored to receive the 2018 Wings Over America scholarship knowing that many outstanding candidates applied. With this achievement, I hope to make this world a better place through my career and generosity.
