

San Diego Padres Randy Jones Scholar

Avery Dozier

Coronado, CA

University of California, Santa Barbara

2021-2022: Junior

Major: Biological Sciences, minor in Physics

It is such an honor to yet again be a recipient of a Wings Over America Scholarship. To me, receiving this scholarship is more than just financial support. It means that people believe in me and my abilities enough to invest their resources and inspires me to hold myself to the highest of standards for my future. It has given me the freedom to find my purpose. This scholarship continues to help me financially towards furthering my education and growing into an impactful member of society, but also supports my core values of service for others. I have been, and continue to be, empowered to take on the challenges of higher education and tackle my goals without fear. With the knowledge that I am supported by Wings Over America and all the people who embody this incredible organization, I will keep bettering myself and shooting for loftier goals every day. I am tremendously grateful for this scholarship's assistance in getting me there. Thanks to your donations, I am taking on my future with excitement and determination. Your generosity, not just towards myself, will inspire the next generation of students that you have invested in through these scholarship awards.
