I am incredibly honored and grateful to receive a four-year scholarship from Wings Over America. The cost of college seems overwhelming and will be a significant challenge for my parents and me. Receiving this scholarship will be a huge help as I pursue my academic and career goals at Duke University. At Duke I plan on double-majoring in Biophysics and Public Policy with a minor in Ethics. With my degree from Duke, I hope to become a research scientist who is also active in policy decisions. I am very proud to be a part of the Navy's extended family and I thank the Wings Over America Scholarship Foundation again for this incredible support.
