I feel very honored to be a recipient of the Wings Over America scholarship. My goal is to attend medical school after graduating from UCLA, and this scholarship will aid greatly in that process. Receiving this award will allow me to continue pursuing my passion of science and medicine with decreased financial burden. Lessening the load of my college tuition will empower me to take on new opportunities that I would not be able to be involved in without financial support, such as volunteer work or unpaid internships. With this scholarship, I feel better prepared to tackle my college education and more able to focus on learning material to help the world. I would like to thank all the donors for the generosity and unwavering support of students pursuing higher education. This award helps me stay committed to my goals and education, and it reminds me of the support that I have from your organization.
