Major: Engineering

Extracurricular & Community-Service Highlights:

WorldQuest (President), Rho Kappa, International Thespian Society, Gifted Advisory Board, volunteer Page for Virginia Beach Elections, Event Assistant with Military Aviation Museum.

This scholarship means that I will be able to advance my learning and achieve my dream of working in the growing space industry. This takes me one step closer to becoming an Aerospace Engineer. Almost everything that we know so far about our universe is from just one small planet in space. Imagine how much information we will learn as we venture forth exploring potential worlds across our galaxy, and perhaps beyond. The goal that I have during my career is to help in building the first human base on Mars. Mars is the next big leap and it is not as far off as it might seem. Winning this scholarship will help me to become a part of that. This scholarship will help me to continue sharing my growing knowledge with others who have an interest in aviation, space, and science.
