I want to thank the Wings Over America Scholarship Foundation for choosing me to receive this generous scholarship. I want to also thank the numerous donors who make such a scholarship possible. Thank you so much for helping me continue my college journey. It means a great deal to me that you have decided to help fulfill my dreams of studying architecture. Architecture has long been my passion, and I thank you for helping this dream become a reality. In addition to helping this dream come true, I must also thank you for helping me against the nightmare that is student debt. I cannot wait to begin my sophomore year of College in the fall. You have no idea how much your contribution means to me. So once again thank you to the foundation and donors for your contributions which have made this all possible.
