Receiving a Wings Over America scholarship is an incredible honor to me and allows me to pursue the highest level of education so that I may continue to serve the country my family and I love so much. As the daughter of a Navy Pilot, it is an honor to be recognized by such a well-established association. Seeing that my Dad's current position as CAG has made him a part of such a well-respected and powerful institution, it humbles me to receive this scholarship and be included in the rich history of the Wings Over America Foundation. Being presented with such a scholarship in some small way validates my family's constant moves and shows that a life of sacrifice and dedication to one's country has truly developed my character into a person for others. As a pre-med student, I understand that I will have many more years of school after I receive my bachelor's degree. With that knowledge, I am truly grateful to receive this four-year scholarship.
