This award reminds me of the sacrifices that my father has made serving in the Navy, and that I am who I am today because of the lessons he taught me and my brother. Every year, I am grateful for everything I have learned and take it with me through college and the rest of my life. Receiving this award these last few years has opened the opportunity for me to go to a small liberal arts school where my education has flourished. I get to go to school every year in my favorite place, where I can continue my education in Environmental Science, compete on a college team, and be a leader. Because of this scholarship program, I have had the chance to go to an amazing college and participate in programs that I might otherwise have struggled to go to. I have met incredible people who inspire me daily and have changed my world, and for that, I am always appreciative of the generosity of Wings over America.
