- Year-Round Employment: Math Tutor, Childcare Provider

The minute I started my senior year at Radford High School I prepared myself for the frenzy of scholarship applications I was destined to complete. My parents and counselors continued to push application after application in front of me and at times I rolled my eyes, but in the end, I cannot thank them enough for encouraging me to apply for this scholarship and many more. This 2018 scholarship means the world to me and my family because it will enable me to continue my quest in higher education. I plan on Majoring in History, which has been my passion for quite some time now. My main goal in life is to influence as many people as I can with my knowledge, but sadly history is something that is often conceived as “boring” or “lengthy.” I, therefore, would like to help transform the public’s attitude on our history. Instead of having a generation who is bored of history, I strive to help create a population of individuals who are loud and proud of their history and culture. I couldn’t be executing my goal without this scholarship, so thank you from the bottom of my heart for your generosity.
