I am incredibly honored to be one of the recipients of the Wings Over America scholarship. Receiving a 2019 award will allow me to continue pursuing my passion of science and medicine with decreased financial burden. Lessening the load of my college tuition will empower me to take on the opportunities that many not have been available without financial support, such as volunteer work or unpaid internships. With this scholarship, I feel better prepared to tackle my college education and more able to focus on learning material to help the world. My goal is to attend medical school after graduating from UCLA, and this scholarship will help aid in that process. I would to thank all of the donors for their generosity and their commitment to helping students like me pursue a higher education. Winning this award helps me stay committed to my goals and my education, and it reminds me of the support I have from your organization.
