- Summer Employment: Ward Farms, Ranch Worker, G.H. Farms Groundskeeper
- Year-Round Employment: McCarty's at Eaton Country Club Cook, Dept. of Revenue Liquor Enforcement Undercover Buyer

I am grateful I am grateful to the Wings Over America Scholarship committee for choosing me as a recipient and appreciate that you declared me worthy of this honor. I have always yearned to become a Mechanical Engineer, not only because I have been a "gearhead," but because I want to improve imperfect mechanics to become more efficient in our everyday lives. I see myself becoming a highly influential contributor to the new, unexplored frontiers of energy. I want to make a difference in the world, creating sustainable forms of energy that have never been pursued or successfully implemented, as most forms such as hydrogen fuel are extremely volatile. I wish to use the dwindling supply of our planet's fossil fuels as a personal catalyst to create revolutionary forms of energy for our world to continue to thrive on for many generations to come. So, Wings Over America, thank you for allowing me to benefit from your scholarship, as you have helped me move another step forward towards accomplishing my goals.
