This scholarship means that I am one step closer to achieving my goal of fulfilling a higher education. It will allow me to concentrate solely and purposefully on my studies, extracurriculars, and building my network as I look towards the future to choose my career path. The award also signifies that I have a support system that wishes me to succeed in my future endeavors. It is a gracious gift that allows me to have a great opportunity that many other do not get the chance to take advantage of. I hope to use this scholarship and make its donors proud but setting my mind to my studies in order to graduate and eventually go to medical school. This award allows me to not stress entirely on the financial toll college may take, but instead stress over how well I will perform on my next exam. I am extremely thankful of this award and this opportunity and words cannot express just how gracious I am.
