I am honored to be a recipient of the USS Nimitz Scholarship. Because of this scholarship, I can pursue my ultimate dream of becoming a doctor, a career path to serve all in need because healthcare should be a right not privilege to every human. In the fall of 2018, I will continue my effort to pursue my degree in biology at a four-year institution, Bowling Green State University, thanks in part to your generous award. It is scholarships like Wings Over America and the USS Nimitz that make it possible for students like myself to go to college. Thank you for contributing to the success of my future by making my dreams come a reality.
