- ❖ Summer Employment: US Naval Test Pilot School Intern
- ❖ Year-Round Employment: UA University Recreation Competitive Sports Official

I cannot express how grateful I am for receiving a Wings Over America scholarship. Originally from Maryland, moving thirteen hours away from home was hard for me. This distance coupled with the stress of paying for college made the transition to college difficult. As I settled into my new role as a student of UA, I become more comfortable with being away from home, but expenses were constantly on my mind. Receiving a WOASF scholarship has lightened the financial burden and will allow me to focus more on my classes and extracurricular activities. I am extremely grateful to the generous sponsors of the foundation and the entire military community. I look forward to hopefully serving my country as a civilian as an engineer for the Department of Defense after graduation.
