

Rachel Herrera

Two-Year Scholarship Recipient

2017 Graduate

Mechanical and Aerospace Engineering

Princeton University

“Receiving a Wings Over America scholarship award has helped me continue my work teaching English to the underserved Hispanic immigrant community in Trenton, as well as to explore alternative energy through the Princeton Racing Electric team, we investigate new technologies for our electric racecar. Without the Wings Over America scholarship, I would not have been able to meet the expected student contribution towards tuition while balancing my coursework and community involvement.” (2016)

“After graduating Princeton in 2017, I completed a Fulbright Fellowship as an English Teaching Assistant in Mexico. Following my year in Mexico, I joined Deloitte Consulting and have worked on projects supporting the integration of Military Health Systems, the development of the Defense Health Agency, and a project supporting Disaster Recovery after the hurricanes in Puerto Rico. I am currently living in Washington D.C.” (2019)
