Being a recipient of the 2020 scholarship award has lifted a significant financial burden off my shoulders. Choosing to attend a private college where tuition is higher than normal was a difficult decision that I hoped would put me on the right path to gain acceptance into medical school. With the help of this scholarship I feel like my college choice is solidified as the best option I could have picked as it is now not only affordable for me but is bringing me closer to my dream of being a doctor one day. After watching my mom work very hard to help me pay my undergraduate tuition, I am so happy to know that this scholarship will not only take some stress off me, but also off her. This scholarship can truly have an impact on an entire family, and not just an individual. This makes me feel so much more financially stable entering the “real” world after I graduate.
