Receiving this scholarship means much more to me than just financial aid to put towards my higher education. I am honored that Wings Over America Foundation selected me as one of the recipients of their scholarship because it represents the unfaltering support of the military community. In addition to protecting our country, this community always gives back to society through important programs and scholarships like Wings Over America. It humbles me to have the support that is represented by this scholarship, especially because I have learned so much about the true meaning of military family because of my father’s service to our country while in the Navy. This award means I will have the unwavering support of the military family and its heroes guiding me in all my endeavors of the future, aiding my success in and outside of school. To me this scholarship signifies future success, provided to me by the ever-present support of the military, community all throughout America.
