- BU on Broadway Theatre Group
- Terrier Ride Engineering Club, which will showcase the countless opportunities in the field of theme park engineering and gather a community to teach about technology within theme parks next semester.
- Mechanical Engineering Intern for Zamperla

I am so thankful to be receiving a 2024 Wings Over America scholarship. I have always had dreams of pursuing my passions in engineering and I am so grateful for the scholarship committee and for the donors that not only support me as a student but help me turn that dream into a reality. These past two years at Boston University have taught me to grow as a person, a student, and a thinker ready to follow my passion and learn all I can from my time at university. Being at Boston University has also allowed me to pursue other passions including becoming heavily involved in the BU On Broadway theater troupe, as well as exploring professional pursuits where I plan on starting the Terrier Ride Engineering Club, which will showcase the countless opportunities in the field of theme park engineering and gather a community to teach about technology within theme parks. next semester. Having the support of a Wings Over America scholarship has allowed me to focus on my academics and make the most out of my four years in college. I am so appreciative of your investment in my future, and I truly can't thank you enough for helping me realize my potential and dreams as a full-time student at a prestigious institution.
