I am honored to receive a Wings Over America and Maritime Patrol Association Scholarship because for me, they are very valuable scholarship awards. There are many highly qualified students who have applied, along with myself, and I am honored to represent all of them as well. I am very connected to the military through my dad, who is a pilot in the Navy, and being awarded these scholarships has made that connection stronger outside of just the relationship with my dad. Families over America in different branches of the military, all value serving our nation, but sometimes it is hard for others to show their appreciation for these families and individuals. I view these scholarships as one way to show my appreciation. To represent their hard work and selflessness for our country, I put my own hard work into my academics and college tuition.
