I am extremely grateful for being selected as a recipient of a Wings Over America Scholarship for 2018. This means a lot to me; this scholarship will help me achieve my dreams of being a robotics engineer. College is the first step to achieving this goal and this scholarship will help offset the high cost of admission. This in turn will help decrease my stress level allowing me to perform better. With this scholarship, my dreams of changing this world will become a little easier and for that I am extremely grateful to the doors that provide the funds for this scholarship.
