I am extremely excited to have been chosen to receive a scholarship. Being awarded a Wings Over America scholarship and having the support and generosity of others who see potential in me is an incredible honor. This scholarship is a nice reward for my hard work and dedication in furthering my education at Virginia Tech. It will help me to concentrate on my studies in the field of Animal and Poultry Science where I want to focus on the beef industry. This scholarship greatly helps with the financial burden from a family who lives and supports me. Thank you Wings Over America and the naval aviation community for your support.
