After watching all the hard work that not only has my dad put into his career as a naval aviator, but also that my mother has put in as a military wife, has pushed me to work hard for everything that I hope and dream to become. This scholarship shows that because of the hard work from my parents, I have been given the opportunity to create my own path in life. I am so thankful for this scholarship as it will allow me to pursue my dream of becoming a pediatrician and helping children all around the country. I am so proud of all the hard work and dedication that not only my family, but all the other military families around the country have put into their services. It is because of the families that we are given opportunities such as this one to reach our goals and dreams in life.
