U of A Combustion Laboratories High Pressure Spray Chamber group, American Society of Mechanical Engineers, Alpha Kappa Psi Professional Business Fraternity, volunteer with Alabama Action, Servin Bama: Crimson Village Retirement Home and Internship with Jordan & Skala Engineers.

I cannot express how grateful I am for receiving a Wings Over America scholarship. The generosity of this foundation and all its donors is remarkable, and I cannot thank them enough. As an out-of-state student at the University of Alabama, I have quite a few expenses, but Wings Over America has helped make college affordable. Receiving a Wings over America scholarship helps lighten my financial burden, which allows me to focus more on my classes and extra-curricular activities. Being part of a military family, I am used to moving often, and I have learned that it is the people, not necessarily the place, that make somewhere home. Without the support of a Wings Over America scholarship, I never would have met the friends and faculty at UA that help make Tuscaloosa my second home. Growing up in a military family and being blessed with the support of the Wings Over America Scholarship Foundation has inspired me to give back to my country. I hope to one day serve my country as a civilian engineer for the Department of Defense.
