While many aspects of life seemingly dissolve with the passage of time, one thing has remained a constant motivation for me... hope. Throughout all obstacles in life, this hope has propelled me to not only overcome, but more importantly conquer, anything that lies between me and my goal of changing this world. As an Aerospace Engineering student with a double minor, financial aid poses a tremendous hurdle in life. However, receiving the Wings Over America Scholarship boosts my hope to unprecedented heights. Knowing that an organization is generous enough to sponsor me in achieving an education in the career I have dreamed about for years provides me with motivation and joy that words cannot describe. My future is an unknown puzzle; however, receiving this scholarship is a momentous honor that brings this future into reality. Yet this puzzle remains unfinished... pieces are yet to be discovered... and a final image is yet to be revealed.
