Thank you to Wings Over America and the Maritime Patrol Association for awarding me this scholarship to assist in receiving my college education at the University of Georgia. I am grateful that the financial cost of college has eased allowing me to pursue a degree in Poultry Science. I'm blessed to have grown up in the navy community and to be further supported by Wings Over America. Throughout the next four years, I plan to explore the agricultural industry and the career opportunities it will provide. Go Dawgs!
