- Great Mills Lighthouse Productions Theatre Troupe
- Superintendent's Student Leadership Advisory Committee
- Boy Scouts of America
- National Honor Society
- St. Mary's River Watershed Association Summer STEM Internship
- Year-Round employee at Dunkin Donuts

For as long as I can remember, I have loved roller coasters. I was always fascinated by these technological marvels that thrill and excite all kinds of people. As I grew up and started to rationalize my future, thinking of how I could possibly turn this passion into a career, which is why I plan to pursue mechanical engineering at Boston University. Because of their focus on building connections and starting work in the industry early on, I am confident I will be able to achieve my dream and become a roller coaster engineer with a background in design innovation and preparation for my future. I also look forward to keeping my other passions alive by singing, acting, and dancing in many of BU's fine arts programs or social clubs and nourishing my love for theater. I want to sincerely thank the Wings Over America Scholarship Committee and all its supporters for helping to ensure the next 4 years are some of the most educational and exciting of my life. With this scholarship, I will be able to focus on making great strides in my personal, academic, and career goals and focus on learning all I can from the people I will meet at Boston University. Thank you all so much for your gracious investment in my future.
