- American Institute of Aeronautics and Astronautics:
Treasurer & Student Lead for Space Design
Competition: Junior
- Beach & Intramural Volleyball Teams
- University of Virginia Intramural/Recreation
Photographer
- Military Aviation Museum Events Assistant

First off, I wanted to say thank you. I am honored to be receiving this scholarship. Ever since I was young, I have been passionate about aviation and space. My dad was a P-3 Orion pilot in the Navy which sparked a childhood interest that never faded. I got involved with extracurriculars soon after I arrived at UVA. Next year I will be the President of Hoos Flying (UVA Aero Design Team), Treasurer of the UVA AIAA Chapter, and am currently co-founding a CubeSat club here at UVA to give students an opportunity to explore more about jobs in the growing space industry. This summer, I will be working as a systems engineer for Iridium Communications in Chandler, Arizona. This scholarship will allow me to focus my efforts and time on my academics and these clubs, and not have to worry about my educational expenses. Being this involved at UVA wouldn't be possible without the gracious support from Wings Over America donors over the past few years. Thank you again for your generous support of my education,
