First off, I'd like to express how grateful and appreciative I am to be able to receive this scholarship from the USS Gerard R. Ford. Thank you for your generosity in allowing me to accept it. Having this scholarship helps me to be able to complete my undergraduate degree in health science at Spalding University. Receiving this scholarship gives ease of mind to myself and especially, my parents. My parents have always been loving and supporting of anything I have wanted to do. Getting this scholarship helps them during my time in college and allows them to be able to know that my college tuition is handled.

As for me, receiving this scholarship allows me to focus on school and sports, as I am a part of the men's soccer team at Spalding; rather than being stressed out and worrying about my student finances. School is very important to me as I am a health science major on the Pre-PT track. I plan on going to post graduate school to continue my studies in hopes of being a physical therapist. However, this scholarship isn't just about the money. It lets me know that I am viewed as having potential for the future of our society. I will continuously work hard in school and my studies and appreciate having individuals in my corner for support. I greatly appreciate the financial support I have been given to be able to continue my education.
