I was so very excited to receive the email notifying me that I was being given the opportunity to accept a WOA Scholarship. I plan on attending Virginia Commonwealth University, studying business marketing. Once completed, I plan on continuing my education by applying to the Masters of Sports Management program. I would love one day to be a presence in professional sports. I am so very grateful for this opportunity to receive financial support to help me attend college and earn my bachelor's degree. I am honored to have been selected, and it makes me feel that my hard work and academic accomplishments are being recognized. Having the chance to receive this scholarship has given me more motivation to continue to work hard and maintain my academic success. It also makes me happy to know that I am able to contribute to easing the burden of the cost of my education for my parents. Please know that once I have established myself in my career, I plan on extending the support given to me, to others that will come after me. I truly appreciate the generous financial support and the chance to fulfill both my academic and career goals. This scholarship will help me be just one step closer to achieving them. Thank you so much to the Wings Over America organization!
