### Academic & Extracurricular Highlights:

- Goju-Ryu Karate Black Belt
- Alpha Omega Epsilon (A.O.E.)
- WashU Crew Team
- Society of Women Engineers
- WashU Academic Mentor
- McKelvey School of Engineering Academic Tutor

I am incredibly honored to receive a Wings Over America Scholarship Foundation Award. As the daughter, granddaughter, and great granddaughter of Sailors and Marines, I look forward to continuing my family's legacy of service. This scholarship will help me do so by funding a portion of my education. I am about to start my junior year at Washington University in St. Louis, where I am studying biomedical engineering and Spanish. This degree will allow me to serve not only my community but also patients worldwide as I work to improve their quality of life. So far my college courses have just increased my interest in and passion for the field of biomedical engineering, and I cannot wait to continue to learn about all it has to offer and eventually pursue it as a career.

Thank you for making this significant contribution to my education. Your generous grant will allow me to focus on my studies and worry less about how to pay. Recognition by such an esteemed organization inspires me to work even harder, in college and beyond, to honor the proud legacies of my father, my grandfather, and their fellow Naval Aviators.

Thank you again to WOASF and all of your donors for their contributions.
