Receiving the Wings Over America scholarship means I can afford to attend my top choice college, Coastal Carolina University, which has a program of study uniquely suited to my career aspirations. This scholarship brings to fruition many years of dedication to a rigorous college preparation track, proving the focus, sacrifice, and effort was all worth it. Although I still have a long road ahead, I am now one step closer to achieving my dream of becoming a Psychiatrist working in collaboration with law enforcement for criminal behavior analysis and inmate rehabilitation. I can take the next step on that road by studying Forensic Psychology on a pre-med pathway with outstanding law enforcement partnerships that few other colleges can offer. The financial assistance provided by Wings Over America allows me to begin this journey without going into crushing debt before I even apply to medical school. It also bonds me closer to the naval aviation community and will be a cherished reminder of my father's service to our nation. Words cannot adequately express how overjoyed and honored I feel to be selected for this scholarship.
