Statement: This scholarship has enabled me to grow and pursue my goal of becoming a child life specialist. Since my freshman year, I have had the opportunity to study under some of the leading researchers in the field of child psychology and continuing next semester I will be able to learn from the world's top expert in Abnormal Psychology. These are amazing opportunities that would not have been possible without the financial support that this scholarship award provides. I have also joined the Gamma Phi Beta sorority, which also works to provide more opportunities for chronically ill children through Camp Fantastic and Campfire USA. This scholarship has provided me with the means to attend a university that I love and study psychology so that I can truly make a difference once I graduate.
