As an undergraduate student, I am so blessed and honored to receive this award. This award allows me to continue my education, while relieving some of the financial burdens of being a student. This award is very important to me, as it is helping me save money that I can use towards graduate school in the new future. I could not be more thankful to receive this honor, and it only pushes me to work harder. Once again, thank you so much for this award and the opportunity to continue my education. I cannot wait to give back to future students, knowing I have received so much help along the way.
